

# Tufts University Medical Students

Interested in clinical research?

Considering taking time during medical school to get research training and publish in your chosen specialty?

Apply for Tufts CTSI's Predoctoral Fellowship.

This prestigious, NIH-funded two-year program:

- Leads to an MS in Clinical and Translational Science (with the possibility of a PhD).
- Offers a superb research training environment with mentorship by clinical experts in your specialty and nationally known experts in clinical research.
- Provides ample opportunity for publication (MS students typically publish several manuscripts during the fellowship).
- Allows you to network at the Clinical and Translational Science National Meeting.
- Includes stipend and full tuition for a degree at the Sackler School of Graduate Biomedical Sciences.
- Requires a two-year commitment and starts after your second or third year of medical school.

**If you have an interest in quantitative methods, clinical epidemiology, predictive modeling or comparative effectiveness research, consider the Clinical and Translational Science Predoctoral Fellowship.**
